EDUCATION

University of Washington

Bachelor of Science in Computer Science

Seattle, WA

Sept. 2023 – Present

- Expected Graduation: Dec. 2025
- GPA: 3.82/4.0
- Relevant Coursework: Algorithms, Artificial Intelligence, Autonomous Robotics, Data Management, Data Structures & Parallelism, Machine Learning, Software Design, Systems Programming

Clark College

Associate in Science Transfer in Computer Science

Vancouver, WA

Sept. 2021 – Aug. 2023

- GPA: 3.92/4.0

EXPERIENCE

Full Stack Developer & Team Lead

Jan. 2024 – Oct. 2024

Husky Coding Project - rhythmix

Seattle, WA

- Implemented playlist recommendations using **TypeScript**, **MongoDB**, **Spotify API**, and **Node.js**, enabling daily refreshes across 10 genres and **increasing recommendation accuracy by 20%**
- Developed a **responsive, user-friendly UI** using **React**, **Figma**, and **CSS** media queries, ensuring a seamless user experience across all devices
- **Led a team of 6**, managing project development from conception to delivery, facilitating weekly meetings, and ensuring adherence to deadlines and product specifications

Programming Tutor

Jan. 2023 – May 2023

Clark College

Vancouver, WA

- **Assisted 30+ students** with fundamental object-oriented Java concepts and C programming skills, including memory management, data structures, and debugging techniques
- Fostered an **engaging and supportive** environment with code review sessions to help students debug, test, and optimize their code for improved performance and readability

PROJECTS

Nexus AI Chatbot | *Python, FastMCP*

Mar. 2025 – Present

- Developing a scalable AI chatbot in **Python**, utilizing Llama's open source models and the **Model Context Protocol (MCP)** to enable autonomous learning and continuous feature evolution based on user queries
- Integrating **MCP** to enable **real-time search functionality**, enhancing the model's **Natural Language Processing (NLP)** capabilities for dynamic, context-aware responses to user queries

What's That Car? | *Python, TypeScript, React, AWS Services, FastAPI* | [Live](#) | [Repo](#)

Feb. 2025 – Present

- Developed a car identification web app with **RESTful FastAPI/Python** backend and **React/TypeScript** frontend, leveraging **Gemini AI** to achieve **97% accuracy** across **5,000+ car models** and **80+ brands**
- Implemented an account system with **AWS Cognito**, managing over **150+ active users** within the first month of deployment with features for profile customization and social interaction
- **Optimized performance** through connection pooling, TTL caching, and image compression, **reducing API response times by 70%** while efficiently managing data across **DynamoDB** and **S3**

Insight Archives | *TypeScript, React, Next.js, Tailwind, MongoDB* | [Live](#) | [Repo](#)

Sept. 2024 – Jan. 2025

- Developed a full-stack web app delivering Gemini AI-retrieved quotes to **90+ unique monthly viewers**, utilizing **Netlify serverless functions** and **GitHub Actions** for seamless daily content updates
- Implemented a robust content delivery system with **MongoDB** and **SendGrid**, featuring a subscription model with **10+ daily subscribers** and a calendar-based archive for accessing past quotes

TECHNICAL SKILLS

Languages: Python, JavaScript/TypeScript, Java, C/C++, SQL, HTML/CSS

Frameworks: PyTorch, TensorFlow, Node.js, Next.js, Express.js, TailwindCSS, FastAPI, FastMCP

Developer Tools: VS Code, Cursor, GitHub, GitHub Actions, AWS Lambda, Figma, Docker, MongoDB, MySQL

Libraries: React, NumPy, Matplotlib, PyTest, Jest, React Bootstrap
